PEER 1

Checklist for Peer Evaluations				
Scale: 5 = Excellent, 4 = Very Good, 3 = Good, 2 = Acceptable, 1= Minimal, 0 = Unacceptable				
Description	Points (1-5)	Comments		
Navigation/Interface Design Interface is intuitive, interactions meaningful, and user is able to navigate easily to different parts of the movie	5	The navigation is great, interactions meaningful and intuitive. The quit button doesn't seem to serve a purpose beyond asking the viewer if they want to quit. It's a little unnecessary I think.		
Content Language is familiar and comfortable for intended audience. Follows basic rules of spelling and grammar.	5	This looks great to me. Very rich content and appropriate for the		
Visual Design Colors, backgrounds, buttons, and text work together to create a clear and easy viewing experience. Buttons and text are easy to read.	5	Excellent design. All the colors and graphics work very well together.		
Animation Quality Animation works smoothly and appropriately	5	The animation works smoothly I like the little sun rays beaming while the music is playing ;)		
Technical Performance All multimedia elements (e.g., sound, animation, images, etc.) within the movie worked appropriately	3	As you mention, you need to complete the project and you know what needs to be done. Example the video in the memory game, the pictures in the quiz section and the pictures in the Smart Signer section.		
Overall Critique Overall impression of the project, based on requirements and creativity	5	Overall it's a great idea and you've made great progress so far considering the level of difficulty of your project. All the best.		
Total Points (30)	28	Excellent.

PEER 2

Checklist for Peer Evaluations				
Scale: 5 = Excellent, 4 = Very Good, 3 = Good, 2 = Acceptable, 1= Minimal, 0 = Unacceptable				
Description	Points (1-5)	Comments		
Navigation/Interface Design Interface is intuitive, interactions meaningful, and user is able to navigate easily to different parts of the movie	2	Buttons were well marked and it was easy to understand where to go. I however, would like to see some instructions on how to perform the matching. I assumed first I was suppose to drag and drop, but finally figured it out. It wasn't very easy to figure out at first.		
Content Language is familiar and comfortable for intended audience. Follows basic rules of spelling and grammar.	5			
Visual Design Colors, backgrounds, buttons, and text work together to create a clear and easy viewing experience. Buttons and text are easy to read.	4	I think your layout is very clean and inviting.		
Animation Quality Animation works smoothly and appropriately	5			

Checklist for Peer Evaluations			
Technical Performance	1		
All multimedia elements (e.g., sound, animation, images, etc.) within the movie worked appropriately		* Quit and Rules buttons not working in opening scene * After I went to rules or quit scene during the game, I couldn't use those buttons again. * When I hit the go back button it sound like the music kept playing, and then it started playing upon itself. I had the same issue. I had to add a stopSound to the buttons. * I notice I could enter numerals for my name. I think you can prevent that by only embedding letters for that input text field. * I couldn't get the matching to work either. I could click one card, have it reveal, but then when I pick another card (I assume the matching card) it disappeared before reveal itself.	
Overall Critique	3	Love the idea. The vid clips of the signing are really cool.	
Overall impression of the project, based on requirements and creativity			
Total Points (30)	20	Excellent.	

Other Comments: Other Comments: Like you said you still have some work ahead of you. It definitely seems quite challenging what you're trying to accomplish. Good luck finishing it up! I'll be excited to see it went it's complete.

PEER 3

Scale: 5 = Excellent, 4 = Very Good, 3 = Good, 2 = Acceptable, 1= Minimal, 0 = Unacceptable	Checklist for Peer Evaluations				
Navigation/Interface Design Interface is intuitive, interactions meaningful, and user is able to navigate easily to different parts of the movie Content Language is familiar and comfortable for intended audience. Follows basic rules of spelling and grammar. Visual Design Colors, backgrounds, buttons, and text work together to create a clear and easy viewing experience. Buttons and text are easy to read. Solution Quality Animation Quality Animation works smoothly and appropriately Technical Performance All multimedia elements (e.g., sound, animation, images, etc.) within the movie worked appropriately Overall Critique Overall impression of the project, based on requirements and creativity Logically it makes sense, but experientially it was just kind of hard to get around. There was so much going on, there needs to be more hierarchy. Language is familiar and comfortable for intended audience. Follows basic rules of spelling and grammar. 5 Very nice—if I were nitpicky I'd say reconsider the hierarchy between "My SmartSigner and the name of the lesson. They both want your attention at once, and it's confusing because the lesson is slightly smaller and bold, and the name of the program is slightly smaller and bold, and the name of the program is slightly smaller and bold, and the passon words, but I didn't get that they were the lesson, I thought they were navigational buttons. But this is relatively picky since the basics are so good. I just saw the opening animation, it was a bit clunky. Missing elements (you and me both, sister). It looks so professional that the little things matter much more. I like the little functional details here and there, and I like your logo. Can't wait to see it completely up and running. Very ambitious.	Scale: 5 = Excellent, 4 = Very Good, 3 = Good, 2 = Acceptable, 1= Minimal, 0 = Unacceptable
